Introduction

A Software Engineer with a passion for learning and software solutions. Passionate about developing solutions and never backs down from a good challenge. Eager to leverage technical skills, communication skills and apply my diverse experience with a developer team!

Technical skills

Languages [Java, Python, JavaScript, CSS, SQL, HTML5, Jinja2] **Frameworks/Libraries** [Express, React, Bootstrap, Flask, SpringBoot, Mongoose, Bcrypt] **Database** [MySQL, MongoDB] **Version Control System** [Git, GitHub] **Tools** [Postman, Agile methodology]

Technical Projects

Active Ally | (Full-Stack Software Engineer/Developer) | [github link](#) |

Allows users to Track workouts, Post workouts, Create Accounts (Java, SpringBoot, MySQL, Bootstrap)

- Increased user security and data protection with Bcrypt and MySQL.
- Designed front end with Implementation of bootstrap for easy maintenance and responsive design.
- Built out login and registration complete with password protection using Bcrypt, personal information fields with validations.

Monster Dietz | (Full-Stack Software Engineer/Developer) | [github link](#) |

Allows users to look up recipes using API (Python, React, MongoDB, Bootstrap, Express, Node)

- Created a website using MongoDB, Express, React and Node (MERN) for a more responsive website experience.
- Improved loading and rendering times while minimizing refresh screens using React.
- Implemented an API to pull recipes from Spoonacular API.

Experience

Vences Remodeling | Plumbing foreman | Charlotte NC

June 2019 - PRESENT

- Assigned ~10 plumbers to specific tasks to complete and supervised activities for quality (excavation, pipe laying, water and service connection, system testing) resulting in consistent profit and 100% house inspection passes
- Reduced layout deployment time by creating a system that expedites layout planning while reducing errors.
- Improved new employee method retention by creating cheat sheets for them to study.

Education

Coding Dojo | Full-Stack Developer Certificate | Remote

March 2023

- Immersive 4 month Full-Stack Training Program in Python, Java, Mongo, Express, React, Node.js.
- Worked and collaborated 100% remotely, Full Stack CRUD application built in 5 hours or less
- Spent 1000+ hours on intensive coursework through all phases of project development of full-stack application including building, testing, debugging, and deploying.
